THE 'POWER' STORY

India is set for a major transformation, owing to the reforms Government is introducing, thereby bringing opportunities for every critical sectors; Energy being a significant sector. Being the third largest economy in the world, & at the centre stage of many global interactions & investments, the modernization of the economy is at the realm of a huge impetus due to the growing manufacturing push.

In the coming decade or so, due to rapid urbanization & further economic development, huge pockets of population will be shifted from rural to urban sectors, hence accelerating the energy need of the country. Vast industrialization will encourage the policy makers to take strenuous measures to ensure 'power for all'. Although the use of energy has doubled since FY' 2000, however, the consumption has still a lot of catching up to do as it is just one third of the global average consumption. Currently , precarious financial state of the energy sector is a bone of contention for the upliftment of the industry. Hence, despite the measure taken by Government to strengthen the Power Sector, a lot still needs to be taken care of.

OVERVIEW

UDAY, a revival package scheme for Distribution companies, was seen as a major boon to the fraternity; however, of late, it seems that most of the DisComs are still grappling with it, terming it as another financial restructuring scheme. Despite the Government's honorable intentions of UDAY & its outcome, many conventional & non conventional power companies are yet to come terms with the apathy of the sector.

THE ECONOMIC TIMES INITIATIVE

Since the last 3 successful editions of the Power Focus Summit, The Economic Times endeavors to bring together the stakeholders of the industry- Govt & Private- on a common platform to deliberate on key challenges & resolution for a better, effective & smooth running of the Power & Energy sector. In an attempt to work collaboratively towards a better & energy abundant future, it is imperative for the fraternity to invest their time & effort.

MAPPING THE TRENDS

ADVISORY MEMBERS

Amit Kapur
Partner
J Sagar Associates

Ashish Khanna
ED & CEO
Tata Power Solar

Ashvini Kumar
CMD
Solar Energy Corporation of India

Deepak Amitabh
CMD
Power Trading Corporation

I S Jha
CMD
Power Grid Corporation

Joy Saxena
Executive Director
Vikram Solar

Jyoti Arora
Joint Secretary
Ministry of Power, Govt of India

K S Popli
Chairman
IREDA
